

September 16, 2006

Hi, my name is Jessica [REDACTED] I am 20 years of age. I started to do drugs right after my 19th b-day. It started with "E" and Mushrooms. Then I stopped doing the two for a few months and then started to do Cocaine. I liked the Cocaine far too much.

The feelings that Cocaine gives you are unbelievable. The burning feeling you get in your nose when u snort a line, as well as the tingling feeling that you get all through your body. I never thought I would be able to quit, but then again I never thought I would even start. Luckily, my wonderful family never gave up on me and found me help, and I thank our Father for them. My mother found a place in White Rock that does laser treatment. It is called "Imagine Laser works".

For all the people out there that have lost hope and faith in themselves regarding recovery, think again, because this place will work for you. It is the best treatment out there! The day that my mother brought me in for the treatment, I was cured in a half hour time. The treatment is an 8 session treatment, that is extended to last a few weeks.

The day that my mother found this place "Imagine Laser Works," I was going crazy all day. I was miserable, yelling at everyone, wanting to go back to the park so I could get another fix, and so on. My mother and father took me shortly after dinner and honestly, I did not know what to expect. However, less than a half an hour through the laser treatment I was cured.

All the cravings I was getting were gone. The treatment relaxed my entire body and mind. Since August 29, I have yet to get cravings to do more drugs. This laser treatment is a miracle! Each time you go in for a treatment, different points on the body are used.

For example, it starts in the ear. There is about eight or nine different spots in the ear that are lasered. After the ears, come's the hands. There is about five to six different spots done their, then it goes to the knees, and finally the feet at the end. The hand's, knee's and, feet are the best spots!
